# Test Graphs

L3I Spring 2020

- In preparation of the defense of your Graph Theory project, you must imperatively prepare a text file for each graph present in this document.

- During the defense, I will tell you which ones I want to use.

- I may also ask you to make slight changes to these graphs (addition or modification of an edge, a value, ...). To do so, it must suffice to edit the corresponding .txt file.
